BOOK SYNOPSIS

Are you looking for concise, practical answers to those questions that are often left unanswered by traditional references of the retina? Are you seeking brief, evidence-based advice for the daily examination of patients? *Curbside Consultation in Retina: 49 Clinical Questions* provides quick and direct answers to questions most commonly posed during a “curbside consultation” between experienced clinicians. Dr. Sharon Fekrat, along with co-editors Drs. Darius Moshfeghi and Dean Elliott, have designed this unique reference that offers expert advice, preferences, and opinions on a variety of clinical questions commonly associated with the retina. The unique Q&A format provides quick access to current information related to the retina with the simplicity of a conversation between two colleagues. Images and references are included to enhance the text and to illustrate clinical diagnoses. *Curbside Consultation in Retina: 49 Clinical Questions* provides information basic enough for residents while also incorporating expert pearls that even high-volume ophthalmologists and specialists will appreciate. Optometrists, ophthalmologists, ophthalmologists-in-training, and even retina specialists will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: • What is the treatment paradigm for postop CME? • How do I follow a patient who is pregnant and also has diabetes? • How should I counsel my patients with dry AMD and what-about various vitamin supplements? • What systemic medications require periodic fundus evaluation, what do I look for and what tests do I do? • How can I differentiate all of those white dot syndromes?
